

Gentlemen:

I respectfully urge the FCC to reject the National Assoc. of Broadcaster's petition 04-160.

I pay a monthly fee for the privilege of getting my news, weather, and entertainment from XM radio. This is extremely important to me because I travel in and out of areas that have poor or no radio reception. XM radio provides me the ability to keep up with news, events, trafffic, weather, and any road emergencies that may be of interest, since I am behind the wheel of a large truck all day.

As a consumer, and as one who pays for the special service that XM provides, I don't believe that the NAB has a right to limit the information that is provided to a paid subscriber.

XM Radio is a lifesaver for over-the road truckers, salesmen with long distances to drive, and other people who have to be on the road for many hours at a time. They provide us with such a variety of helpful information which educates, informs, and entertains. THEY EVEN HELP KEEP US AWAKE AND ALERT!

I urge the FCC members to spend a week connected to XM. I believe at the end of that time, you'll fully understand how important XM is to so many of us.

I also urge the NAB to hook up and listen. . . maybe they'll learn something.

Sincerely,
Warner C. Webb
